

SIF AU Conceptual Data Model, NSIP

v.0.5, 2019-07-11

linda.marshall@nsip.edu.au nick.nicholas@nsip.edu.au

This document presents a conceptual model underlying the SIF-AU 3.4.4 data model. The conceptual model is at the level of entities and relations between them; attributes are not listed. All objects in the Australian data model are represented; some objects are represented as relations between entities, rather than as distinct entities.

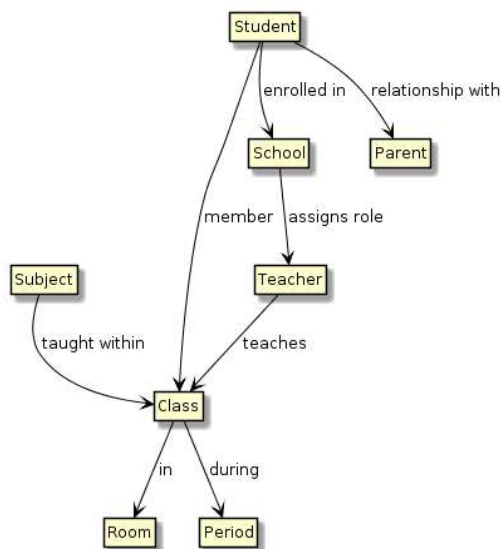

For clarity, the conceptual model is broken up into use cases:

- Enrolment
- Account Provisioning
- Timetable/Attendance
- Finance/Resources
- NAPLAN
- Wellbeing
- Classroom Assessment
- Scheduling
- Statistics
- Teaching & Learning
- Reporting Collections

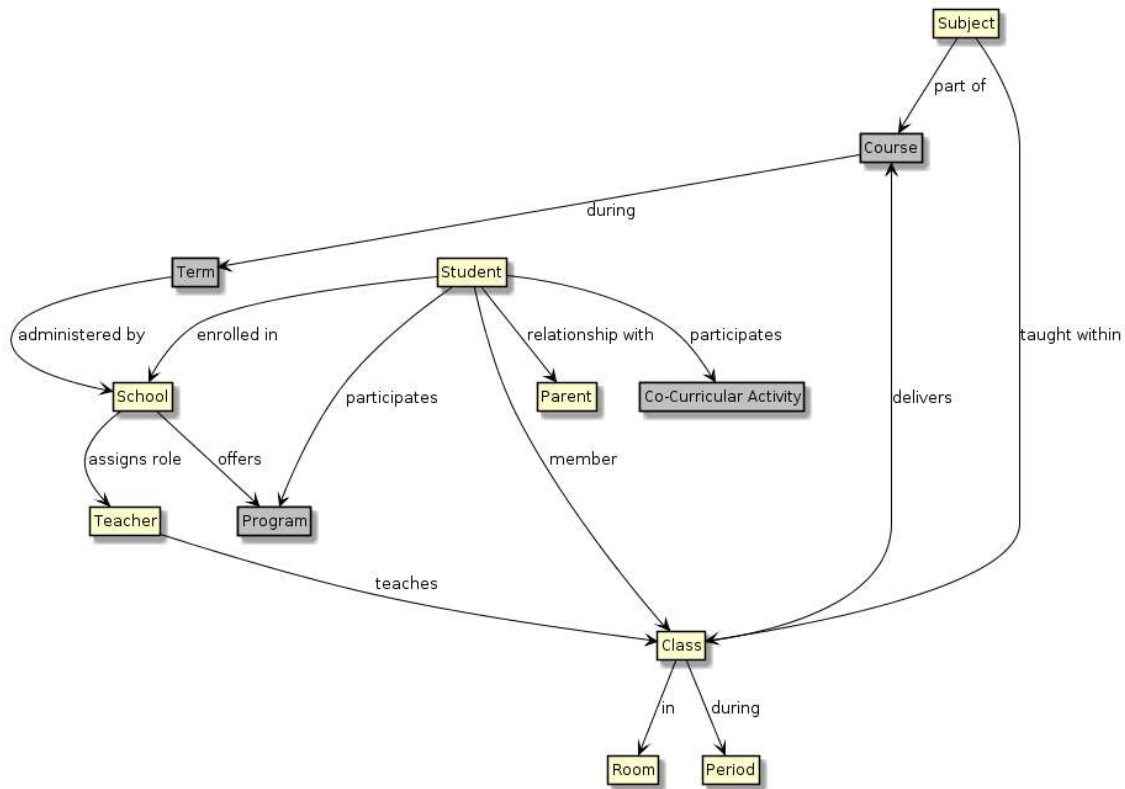

Entities are named with names that the schools sector business can relate to readily, rather than the current names of SIF-AU objects. A list mapping the conceptual model names to SIF objects follows.

Enrolment

The following are the primary objects involved in enrolling a student onto school systems.

The following includes secondary objects which may also be invoked during student enrolment (shaded grey).
