

Unity Data Model Errata

SIF Data Model Implementation Specification (NA) 4.1

Updated: June 8, 2021

1. During conversion xRoster/otherStaffs lost its child grouping tag otherStaff. This was corrected in the Personal Privacy Release (4.2) of Unity.
2. The “list” suffix was incorrectly used on the session tag contained within the xCalendar object. It has been corrected in the Personal Privacy Release (4.2) of Unity to xCalendar/sessions/session.
3. PESC JSON examples were not correctly generated until the Personal Privacy Release (4.2) of Unity.
